Update to this case,

I was emailed by the RP who stated the vehicle was on the harvesting site in Los Osos. He provided me this photo and during the investigation, the plates were reported stolen from 321 E Inger (Case Number SMPD22-0000046). CHP went to the location in Los Osos, contacted the driver who was asleep in the vehicle and was, assuming, told to move along. I still don't have an ID on the male suspect. I've been checking the LPR system and it seems to frequent the Skyway & 135 camera, as well as WB Betteravia & A St. Happy Hunting

To whom it may concern,

I took a commercial burglary report last Sunday, 12/19/21, that involved the attached vehicle. It appeared to be a newer Dodge Durango, possibly a Rt/8 or SRT/8, with red calipers. The vehicle did not have any license plates during the commission of the crime. If located, please stop the vehicle and FI all occupants and forward me the information for further follow-up. Thank you for your assistance in this manner and happy hunting.
